2159 S Sailors Way, Gilbert, AZ 85295

Summary

Junior web developer with a focus on front end development, creating intuitive and clean looking websites. Ability to create full stack programs using Ruby on Rails, HTML, JavaScript and JQuery. Personal interests include solving puzzles, playing with my dogs, spending time with my wife, and getting ready for my baby that's coming in January.

Work Experience

Co-op Web Developer

Valley Group Leadership

Dec. 2017 - Present

Working with a school acquaintance on a website for the Valley Leadership Group. We will be using Ruby on Rails for the backend, HTML5 and CSS for the frontend. The website is meant as a way to showcase the non-profit groups around the valley and award people for their good deeds.

Focused Skills:

- HTML5
- CSS
- Admin Privileges
- Mailers
- Ruby on Rails

Student

Tech Talent South

Sep. 2017 - Present

Tech Talent South is an accelerated web development bootcamp, focused on training beginning developers with the skills necessary to begin their careers in front or backend development. Projects/sites built include: Blog, E-Commerce, Music database, Twitter page, Scheduling page, Bank Interaction system, Employee Tracking system, and a Rock Paper Scissors game.

Focused Skills:

- Google Maps API
- AJAX
- CSS
- Bootstrap
- HTML5
- JQuery
- Ruby on Rails

Sales Development Rep

Infusionsoft

Feb. 2017 - Sep. 2017

Infusionsoft is a CRM and Marketing Automation tool for small business owners. I worked with small business owners accross the United States, and some over seas on their marketing plans and needs. While in this position, I worked with my brother in the marketing department to help with front end designs for mass email campaigns.

Focused Skills:

- Marketing
- Sales
